LAB GUIDE – Blockchain Developer Course
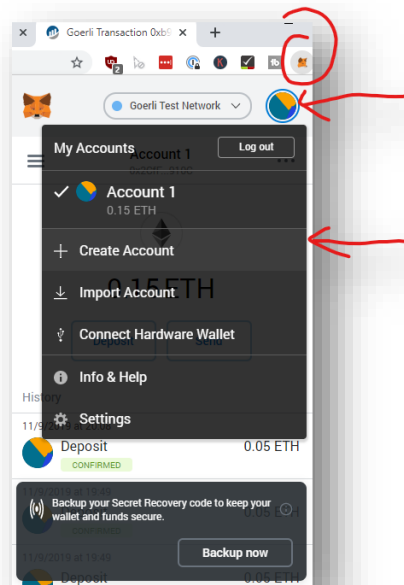

Lab: Send your first transaction

Prerequisites:

1. Chrome or Firefox browser.
2. An Internet connection
3. MetaMask Plugin connected to the Test-Net from the previous Lab
4. Some Funds in your Account

Steps to follow

*Sending Ether from Account 1 to Account 2*

Open MetaMask and add a new Account:

We name it "Account 2", as suggested:

Now you should have 2 accounts, switch back to "Account 1":

Hit the "Send" Button and select "Transfer between my accounts":

Select the "Account 2" as the recipient:

Select "MAX" in the send window and hit "Next" and "Confirm":

Wait until the Transaction comes up as "Confirmed":

Click on the Transaction to open EtherScan and check the status:

Congratulations, LAB is completed
